

[the discipline of great project delivery]

Oracle | Oracle Primavera | Program & Project Management | Change & Learning

WE ARE

...an independent, boutique consultancy with an unrivalled ability to combine deep Oracle and Primavera expertise with disciplined project management techniques and change management strategies.

Our unique blend of targeted, technical expertise, years of commercial experience and our unrelenting commitment to continuous improvement enables us to provide insights that help clients make better technology investment decisions, improve their business processes and achieve tangible business goals. That's why we have a 100% client re-engagement rate.

Solving challenges for Australia's leading businesses

WE BUILD

...long-standing relationships with our clients, most of whom are large organisations in Australia, running capital-intensive projects in the infrastructure, energy and resources sectors. This means we understand each business and its challenges, which enables us to maximise the value we provide, both now and into the future.

As an independent boutique consultancy, our clients receive direct support from the Prescience management team. Collectively, we have more than 40 years experience in driving the discipline of great project delivery – in program and project management, business and technology solutions delivery, human resources, and change management – all with a strong track record of delivering results.

WE KNOW

...what is required for success in Oracle and Primavera projects, including new implementations, upgrades, business transformations and support roles, as well as D&C and EPCM environments. By carefully considering the people, process and technology impacts, we deliver practical, quantifiable value to every client - safely, on-time, on-budget and to rigorous quality standards.

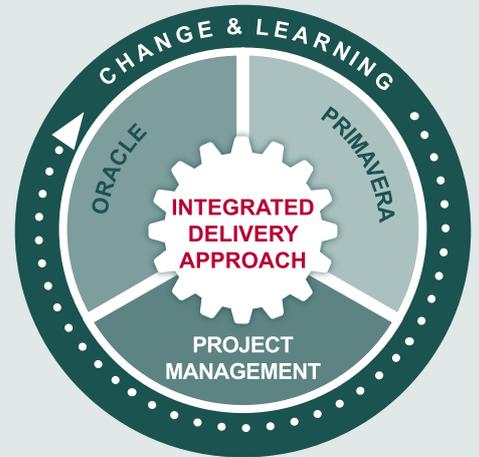

WE PERFORM

...excellent work for our clients, examples of which include:

- Managing and coordinating all aspects of project delivery from concept development, specification, estimation, planning and construction to testing and commissioning for the design elements of various infrastructure projects;
- Implementing Primavera EPPM for a major resources company and providing ongoing support to address complex scheduling requirements at multiple sites;
- Making recommendations and leading the implementation of aligning cost control and work breakdown structures between Primavera P6 and the Oracle ERP system for a significant capital program for a resources company;
- Leading global and domestic Oracle ERP upgrades and implementation projects with diverse and geographically dispersed stakeholder groups, facing significant timeline and resourcing constraints, delivered on-time, under budget in accordance with defined requirements;
- Providing database administration support services particularly in Oracle Applications 11.5.10 (AP, AR, GL, FA and PA modules), as well as a variety of Oracle Developer Tools;
- Acting as the change lead and developing an eLearning solution using UPK for an energy provider that was introducing a new user group to Oracle E-Business, at the same time as introducing a new version (R12) to existing users;
- Supporting a leading resources company in working with the business to improve their processes and data, and the implementation of the Oracle Projects module.

“Prescience Technology adds value through their specialist expertise in Oracle E-Business. I engaged Prescience Technology in planning for an Oracle R12 upgrade. They were a true partner - they tailored their offering and collaborated to deliver on a partnership basis, it was just what we needed.”

Mark Jermolenko
Formerly Strategy and Enterprise Architecture Manager
Major Australian manufacturer

WE DRIVE

...real and quantifiable business outcomes through our unique combination of deep technical knowledge, commercial pragmatism and the prescience that comes only from experience.

WE LIKE

...to work with colleagues and clients who are innovative, talented, tough and honest and who are demanding of continuous improvement. We build tailored teams, ensuring our consultants complement the expertise available client-side and offer maximum benefit and value. By sharing problems, collaborating on the solutions and supporting each other, we achieve mutual success.

WE RECRUIT

...only the best in their field; people who believe in and practice the constant pursuit of excellence, who learn from every situation and apply it thereafter. They also demonstrate our six core values in the way they operate, interact and deliver: talent, tenacity, teamwork, integrity, passion and prescience.

It's what we call **the discipline of great project delivery.**
