[the discipline of great project delivery]

PrescienceAdvantage™ for Oracle

WE ARE

…an independent, boutique consultancy with an unrivalled ability to combine deep Oracle and Primavera expertise with disciplined project management techniques and change management strategies.

Our unique blend of targeted, technical expertise, years of commercial experience and our unrelenting commitment to continuous improvement enables us to provide insights that help clients make better technology investment decisions, improve their business processes and achieve tangible business goals.

An accredited Oracle Gold Partner and Oracle Primavera Specialist, we understand not only the technology but also the commercial realities and the potential impact of key delivery decisions. That's why we have a 100% client re-engagement rate.

WE SPECIALISE

…in Oracle Database and Development tools, Oracle E-Business Suite, Oracle Primavera and Oracle UPK. Our implementation and upgrade professionals combine years of real-world experience with unequalled Oracle implementation management knowledge to ensure the success of every project we are involved with.

WE KNOW

…Oracle applications and technologies back to front. Our seasoned consultants can create the initial solution concepts and design, assess them objectively and break them down into their smallest components, resolve issues to refine the design and build them back up into the practical and pragmatic solutions that businesses need them to be. We also have a deep and intimate understanding of how Oracle interfaces with other technologies.

Focused Oracle specialists

WE BRING

…specialist skills in Oracle eBusiness suite, database and development technologies. We have broad enterprise knowledge and implementation experience, especially in delivering R12 upgrades.

We also leverage our deep project management expertise and extensive knowledge of the industries in which we work.

It's this unique combination of expertise which enables us to help clients resolve their toughest challenges in a sustainable manner.

ORACLE Gold Partner

The PrescienceAdvantage™ suite of services

E-Business Suite implementations and upgrades

WE RECOGNISE …that when it comes to Oracle E-Business Suite implementations finding the right balance between business and technical experience can be quite a challenge. Our consultants have a unique capability to help clients harness both standard and advanced Oracle functionality to meet specific business requirements. They maintain a keen focus on quality assurance, risk management, knowledge transfer and process simplification. This practical, pragmatic approach addresses both cost saving and optimisation without compromising quality.

Databases

WE OFFER …a broad range of database services designed to help achieve optimal performance. These include installation, upgrades, configuration, trouble-shooting and a complete system health check

WE TAILOR …our offering to address your particular challenge, identifying the issues, implementing a fix and most importantly ensuring that it is sustainable. Clients can also bring our talented database specialists onsite for short or longer term engagements as necessary.

Development

WE USE …a variety of tools, from early versions through to their latest incarnations including HTML, Java, Oracle Forms and Reports and Oracle Application Integration Architecture (AIA) to develop databases, application server and other core applications customisations, for E-Business Suite (Financials, Projects, Supply Chain, EAM and HR and Payroll) and Primavera.

Primavera

WE UNDERSTAND …the challenges of portfolio management only too well, which is why we offer a comprehensive range of services that help clients achieve robust, balanced and effective planning and EPPM solutions. We recommend, implement and support Oracle Primavera and can also provide training to enable your team to make the most of its extensive capabilities.

Change and Learning

WE HAVE …extensive experience in tailoring innovative Change and Learning solutions for Oracle implementation and upgrade projects. Our consultants can identify the impacts of the impending process changes and then develop and implement an integrated change and learning strategy, including the design and delivery of training using a combination of online, using Oracle UPK and other programs, and face to face methodologies.

Our accredited consultants understand what is required in complex system implementations and upgrades to ensure user adoption. When coupled with Prescience's commitment to the discipline of great project delivery, that knowledge becomes invaluable in helping to achieving business goals.

Support Services

WE PROVIDE …technical support for all of the Oracle products and applications we recommend. We work closely with clients to ensure that they receive prompt and efficient support in a way that best suits them. Our qualified support engineers are available to assist our clients either via a dedicated Support Desk or via online remote diagnosis.

CHANGE & LEARNING
ORACLE
PRIMAVERA
INTEGRATED DELIVERY APPROACH
PROJECT MANAGEMENT

Proven experience

WE DELIVER …successful projects – safely, on-time and to rigorous quality standards – every time.

Some recent engagements include:

- Leading Oracle ERP implementations facing significant timeline and resourcing constraints, delivering on-time, under budget and as specified

- Resourcing leading roles in major Oracle implementations, including project management, delivery and quality assurance

- Validating and confirming the business requirements to extend the Oracle E-Business footprint for a large manufacturer

- Recommending and leading on aligning cost control and work breakdown structures between Oracle Primavera and the Oracle ERP system, as part of a capital program for a resources company

- Providing database administration support services particularly in Oracle Applications 11.5.10 (AP, AR, GL, FA and PA modules), as well as a variety of Oracle Developer Tools

We combine the prescience that only comes from experience, with deep technical knowledge, proven experience of successful project delivery and commercial pragmatism to drive real business outcomes

It's what we call **the discipline of great project delivery.**
