PrescienceAdvantage™ for Oracle Primavera

WE ARE

...an independent, boutique consultancy with an unrivalled ability to combine deep Oracle and Primavera expertise with disciplined project management techniques and change management strategies.

Our unique blend of targeted, technical expertise, years of commercial experience and our unrelenting commitment to continuous improvement enables us to provide insights that help clients make better technology investment decisions, improve their business processes and achieve tangible business goals.

An accredited Oracle Gold Partner and **Oracle Primavera Specialist**, we understand not only the technology but also the commercial realities and the potential impact of key delivery decisions. That's why we have a 100% client re-engagement rate.

WE KNOW

...one of the biggest challenges for project-intensive organisations is managing the portfolio of projects underway at any one time. That is why we recommend, implement and support Oracle Primavera through our PrescienceAdvantage™ suite of services.

WE BELIEVE

...Oracle Primavera's P6 Enterprise Project Portfolio Management solution is the ideal tool to help organisations complete projects on-time and within budget. It enables companies to prioritise, plan, manage and evaluate projects and programs. The Oracle Primavera suite also includes Portfolio Management and Risk Management tools.

These various components allow companies to manage budgeting, planning and scheduling, cost management, resource allocation, risk analytics and even change management activities, providing real-time reporting through flexible, web-based interfaces.

Putting you in control

WE BRING

...broad enterprise knowledge and implementation experience to the Oracle Primavera product suite. We also leverage our deep project management expertise and extensive knowledge of the business and Oracle applications that integrate with Oracle Primavera, to optimise their interface.

It's this unique combination of expertise which enables us to help clients implement or upgrade and embed Primavera in a high value, sustainable manner.

Project Portfolio Management

The PrescienceAdvantage™ suite of services for Primavera

Primavera Roadmap

WE DRIVE ...and accelerate the achievement of project maturity by helping organisations determine the best way to use and implement Primavera through the development of a robust Primavera Roadmap. We assess current processes, identify gaps and work closely with our clients to implement a strategy that aligns people, processes and technologies.

Licenses

WE ADVISE ...on the optimal way to structure your Oracle Primavera licenses. As an accredited Oracle Primavera reseller, we can arrange your initial licenses, supplement existing licenses as required, and organise upgrades to the latest software versions. Our quotes are commercially competitive and our aim is to minimise your operational and capital expenditure - ensuring compliance and powering growth.

Implementation and Upgrades

WE UNDERSTAND ...implementing or upgrading Primavera involves more than simply installing a new technology system. Primavera supports a structured way of working, a way of managing the multiplicity of elements that make up any project, program or portfolio. We provide a holistic solution, incorporating the large range of Primavera and Oracle products, including Portfolio Manager and Risk Manager to provide a robust integrated system.

WE PLAN ...carefully to ensure the functional capability of the software is maximised; extraneous complexity is avoided; critical process and data elements are not lost in transition; and relevant user and application support are in place to ensure sustainable solutions that drive value.

Scheduling and Administration

WE DEPLOY ...our talented planning and/or scheduling specialists, either onsite or remotely, to assist clients in short or longer term engagements. Our experienced consultants can help you manage through immediate resource shortages on critical projects, or assist your team while they are coming up to speed with Primavera. Either way, we can tailor a solution to suit your business priorities.

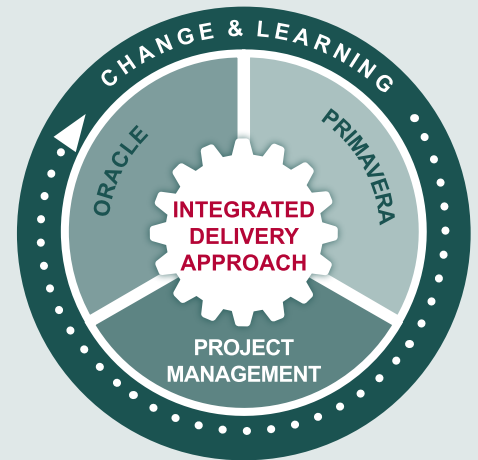

Change and Learning

WE CUSTOMISE ...change and learning solutions to suit your business need - from change readiness assessments to integrated change plans, or developing and delivering online and face to face training.

WE INNOVATE ...to drive maximum user uptake in tough project environments, where time to productivity is paramount and a more tailored solution works best. Our focus is on embedding and sustaining new processes so you see tangible outcomes from your investment.

Support Services

WE OFFER ...flexible, scalable and value driven support based on years of experience in creating sustainable enterprise solutions. Our support is delivered by our qualified support engineers either via a dedicated Support Desk or via online remote diagnosis. The PrescienceAdvantage™ Support Plan can be extended to cover onsite support where events require engineers to be onsite to identify, troubleshoot and solve problems.

WE TAILOR

...our offering to address your particular challenge, either advising on the approach, providing specialist teams or single resources to augment your in-house staff. We focus on quality assurance, risk management, knowledge transfer and process simplification. This practical, pragmatic approach ensures cost saving and optimisation without compromising quality.

Some recent engagements include:

- Advising and leading on aligning cost control and work breakdown structures between Oracle Primavera and the Oracle ERP system within a capital program for a resources company
- Implementing Oracle Primavera into multiple sites for a major resources company
- Providing Primavera Planning / Scheduling expertise to a major resources company at several operational sites
- Developing a comprehensive, tailored Oracle Primavera eLearning program integrating existing operational and corporate HR processes
- Providing dedicated support to a leading resources company where Primavera was a new tool, helping them embed the software.

We combine the prescience that comes only from experience with deep technical knowledge and commercial pragmatism to drive real business outcomes.

It's what we call **the discipline of great project delivery.**
