

# SHOULD YOU UPGRADE YOUR PROJECT SYSTEMS?

Whether you are considering cloud migration, want to reduce compliance related risk or are experiencing poor system performance, use this flowchart to determine whether you need to consider an upgrade for your project controls software, and determine what type of upgrade is most appropriate.

Regular upgrades should be part of a wider plan to continually increase efficiency and maintain compliance and agility. Our goal is to ensure that you leverage the latest project controls technology to its fullest to increase the efficiency and effectiveness of your operations and to maximise the benefit from your significant investment.
